DigiGEAR

Introducing Augmented Reality in the VET Sector with a focus on the Automotive Engineering

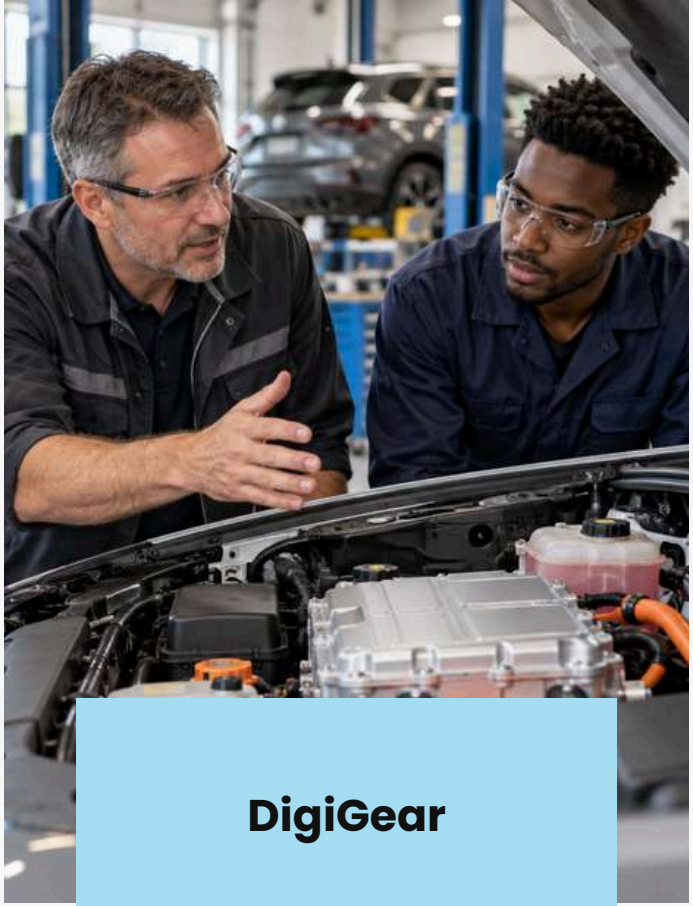

Introducing Augmented Reality in the VET sector with a focus on the Automotive Engineering sector

Programme: KA2 – Strategic Partnership in VET

Duration: 09/2023 - 08/2026 (36 Months)

Countries: Italy, Greece, Germany, Slovakia, Portugal, Sweden

DigiGear

Explore electric vehicles in a new dimension

Digital learning meets Augmented Reality.

Discover two connected learning environments designed to support automotive vocational education and training.

TWO ENVIRONMENTS, ONE LEARNING JOURNEY

- Understanding electric vehicles means connecting technical knowledge with the systems and components behind it.
- DigiGEAR brings together e-learning modules and interactive AR activities to support this connection.
- Build your understanding through digital learning, then explore electric vehicle components through visual and interactive experiences.

Co-funded by the European Union

DigiGEAR

Introducing Augmented Reality in the VET Sector with a focus on the Automotive Engineering

DISCOVER THE E-LEARNING PLATFORM

- Build your knowledge of electric vehicle technology.
- The DigiGEAR e-learning platform provides the digital learning environment for the project's training programme.
- Its learning modules are complemented by activities in the AR application, helping learners connect course concepts with visual exploration.

Visit the platform:
https://elearning.digigear.eu/

Project EXPLORE THE AR APPLICATION

- Bring electric vehicle components into focus.
- Available as a standalone Android application, the DigiGEAR AR app combines interactive 2D activities with 3D Augmented Reality content.
- Explore how important electric vehicle components look, what they do, where they belong and how they connect.
- The app accompanies the e-learning modules and can also be accessed without user authentication.
